

IN THE CLAIMS:

Please amend the claims as follows:

1. (Original) Mobile electronic device, comprising a storage to store digital content and processor being configured to edit and change said stored digital content, characterized by a component to obtain data provided from a sensor, wherein said processor is configured to generate and/or process said digital content according to said obtained sensor data.
2. (Original) Mobile electronic device according to claim 1, further comprising a communication device.
3. (Original) Mobile electronic device according to claim 2, characterized by a mailbox, wherein said digital content to be edited comprises an announcement message contained in said mailbox.
4. (Original) Mobile electronic device according to claim 3, wherein said processor is configured to generate and/or process a basic announcement of said mailbox automatically according to said obtained sensor data.
5. (Currently Amended) Mobile electronic device according to claim 3-~~or~~4, further comprising a text to speech transducer, to read out said announcement stored as a text data file.
6. (Original) Mobile electronic device according to claim 4, wherein said communication device is a mobile telephone.
7. (Currently Amended) Mobile electronic device according to ~~anyone of the preceding claims~~claim 1, wherein said stored digital content comprises digital audio data.
8. (Currently Amended) Mobile electronic device according to ~~anyone of the preceding claims~~claim 1, wherein said stored digital content comprises digital picture/video data.

9. (Currently Amended) Mobile electronic device according to ~~anyone of the preceding claims~~claim 1, wherein said stored digital content comprises digital text data.
10. (Currently Amended) Mobile electronic device according to ~~anyone of the preceding claims~~claim 1, further comprising a processor configured to evaluate said obtained sensor data.
11. (Original) Mobile electronic device according to claim 2, wherein said component to obtain sensor data comprises a receiver.
12. (Currently Amended) Mobile electronic device according to ~~claims 2 and 7~~claim 2, wherein said component to obtain sensor data comprises at least one sensor built-in in said mobile electronic device.
13. (Currently Amended) Mobile electronic device according to ~~anyone of the preceding claims~~claim 1, wherein said sensor is an acceleration sensor.
14. (Currently Amended) Mobile electronic device according to ~~anyone of the preceding claims~~claim 1, wherein said sensor is a position sensor.
15. (Currently Amended) Mobile electronic device according to ~~anyone of the preceding claims~~claim 1, wherein said sensor is an optical sensor.
16. (Currently Amended) Mobile electronic device according to ~~anyone of the preceding claims~~claim 1, wherein said sensor senses atmospheric conditions.
17. (Currently Amended) Mobile electronic device according to claim 1 further comprising a processor being configured to change device settings according to said obtained sensor data.
18. (Currently Amended) Mobile electronic device according to claim 1 further comprising a user interface, for providing a user interface for manually overriding said generating/processing.
19. (Currently Amended) ~~Method for generating/processing a digital content stored on a mobile electronic device in according with obtained sensor data~~, comprising

[[ -]] obtaining data from a sensor, and  
[[ -]] generating/processing said digital content stored on a mobile electronic device in accordance with said ~~obtained sensor data~~ obtained from said sensor.

20. (Original) Method according to claim 19, further comprising receiving a communication request.
21. (Currently Amended) Method according to claim 19 ~~or 20~~, wherein said generated digital content is stored as an announcement file of a mailbox.
22. (Currently Amended) Method according to ~~one of claims 19 to 21~~ claim 19, further comprising evaluating said ~~obtained sensor data~~ obtained from said sensor, and wherein said generating/processing of said digital content is done in accordance with a result of said evaluation operation.
23. (Currently Amended) Method according to ~~anyone of claims 19 to 22~~ claim 19, further comprising receiving sensor data from an external sensor.
24. (Currently Amended) Method according to ~~anyone of claims 19 to 23~~ claim 19, further comprising transmitting of said changed digital content.
25. (Currently Amended) Method according to ~~anyone of claims 19 to 24~~ claim 19, further comprising changing of device settings in accordance with said sensor data.
26. (Currently Amended) Method according to ~~anyone of claims 19 to 25~~ claim 19, further comprising manually editing said digital content by user input.
27. (Currently Amended) Software tool comprising program code means for carrying out the steps of ~~anyone of claims 19 to 26~~ claim 19 when said program is run on a computer device or a mobile electronic device.
28. (Currently Amended) Computer program comprising program code means for carrying out the method of ~~anyone of claims 19 to 26~~ claim 19 when said program is run on a mobile computer or network device.
29. (Currently Amended) Computer program product comprising program code means stored on a computer readable medium for carrying out the method of ~~anyone of~~

~~claims 19 to 26~~claim 19 when said program is run on a network device or a mobile computer device.
